

Video Endoscopy of 25-gauge Pars Plana Vitrectomy Demonstrating Trocar and Various Gauge Needle Insertions and Removals

John O. Mason, III, MD (Birmingham, AL), Peter A. Nixon, MD (Birmingham, AL), Michael A. Albert, MD (Birmingham, AL)

SYNOPSIS

Endoscopic views of 25-gauge vitrectomies showing what transpires when patients undergo insertion and removal of a 25-gauge trocar. Insertion, intraocular injection, and removal of various gauge needles are also demonstrated. Safer techniques and application of 25-gauge vitrectomy and intravitreal needle injection are examined and seen via video endoscopy, which may lead to fewer complications.
