

# **Surgical Management of Vitreo-retinal Proliferation**

Jeroni Nadal, MD (Barcelona, Spain)

## **SYNOPSIS**

Techniques and surgical manoeuvres are presented in the management of proliferative vitreo-retinopathy (PVR) including unimanual and bimanual surgery. Special procedures like peeling under perfluoro-carbon, use of biological stains to visualize the different proliferative membranes, and viscosurgery to treat preretinal membranes secondary to this serious complication of retinal detachment are likewise presented.
