

OFFISS for Microsurgical Scleral Buckling

Jerzy Nawrocki, MD (Lodz, Poland), Zofia Nawrocka, MD (Lodz, Poland), Zofia Michalewska, MD (Lodz, Poland), Janusz Michalewski, MD (Lodz, Poland)

SYNOPSIS

The video presents general idea of scleral buckling for rhegmatogenous retinal detachment. Additional animation of patient's symptoms of retinal detachment is presented. This was created by a patient who suffered the disease, was successfully treated with scleral buckling and was a computer specialist as well. The idea of macrosurgical scleral buckling is compared to the new possibility with the use of OFFISS.
